DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see p. 8-11 of the response, filed May 25, 2007, with respect to claims 1-25 have been fully considered and are persuasive. The rejection of claims 1-16, 20, 22, 24, and 25 under 35 U.S.C. 102(b) as being anticipated by Aoki (USPN 6,465,352 B1) has been withdrawn. Accordingly the rejection of claims 17, 18, 19, 21, and 23 using the Aoki reference have also been withdrawn. The applicant's remarks (p. 8-11) with regard to the differences between the method disclosed by Aoki, that is the use of a hydrogen/nitrogen plasma treatment which *prevents* the formation of copper oxide, as opposed to the claimed method (which reverses an oxidation injury) have been found to be persuasive.

Allowable Subject Matter

2. Claims 1-25 are allowed.
3. The following is an examiner's statement of reasons for allowance: the examiner is unaware if any prior art which suggests or renders obvious a method for forming a metallic damascene structure which involves forming a damascene opening to expose a metallic layer with a portion of it being exposed to an oxidizing agent which causes an oxidation injury which is then partly reversed by a reducing plasma with the damascene structure undergoing a cleaning process and having the opening filled by a metallic plug which contacts the metallic layer.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
